Marcus Oyelaran

marcus.oyelaran@example.test | 555-0102 (fictional) | Riverton

SUMMARY

Mathematics graduate with a focus on statistical computing in Python. Experienced in analyzing research datasets and presenting statistical findings.

EDUCATION

B.A. in Mathematics, Halvorsen College (fictional), 2024

SKILLS

Python (pandas, SciPy, statsmodels, seaborn), descriptive statistics, hypothesis testing, ANOVA, linear regression, correlation analysis, Jupyter Notebook, Excel

EXPERIENCE

Research Assistant, Halvorsen College Psychology Lab (fictional), Sep 2023 - May 2024

- Analyzed survey data from 400 participants in Python using pandas and SciPy.
- Performed one-way ANOVA and independent t-tests to compare group scores, and reported p-values and effect sizes.
- Built regression models in statsmodels to examine the relationship between sleep hours and test performance.
- Visualized results using seaborn and matplotlib for a department poster.

Project: Housing Price Regression (personal project)

- Used Python to calculate correlations between square footage, location, and sale price.
- Built a multiple linear regression model and evaluated it using R-squared and residual plots.
- Data was provided as a single CSV file; no database was used.
